Education

B.Sc. in Software Engineering 2022-Present
Chalmers and Gothenburg University Gothenburg, Sweden

- 180 ECTS*
- Thesis (ongoing): “Trade-offs of Quantized LLMs for Requirements and Test Alignment”

Free-standing Courses 2022-2024
Lund, Linnaeus, and Gothenburg Universities Sweden

- 60 ECTS
- Courses in Mathematics and Computing Science (e.g. Calculus, Linear Algebra, Numerical Analysis)

High School Diploma 2017-2022
Private English Grammar School Bratislava, Slovakia

- A (pass with distinction)
- Mathematics & Computer Science, English (C1)

Work Experience

Developer 2024-Present
Algeno AB Gothenburg, Sweden

- Focusing on developing AI-driven tools to optimize energy use and temperature control in homes and workplaces.
- Technologies used: Next.js, TypeScript, Python, SQL, Docker

Research Assistant 2024
Chalmers University of Technology Gothenburg, Sweden

- Contributed to a research project investigating teaching approaches for computer programming education.
- Focused on analyzing the impact of AI-aided tools and platforms supporting social annotations (e.g., www.perusa11.com) on learning of programming in higher education.
- Interviews, Literature Review, Data Analysis: Python, R, Haskell

IT Consultant & Developer 2023
Chalmers Teknologkonsulter AB Gothenburg, Sweden

- Consultancy in IT sector, sales, participation in various projects with current industry partners.
- Project Manager responsible for the development of a mobile-based application (React Native) for the Regional Cancer Center (Sweden) aimed to help detect melanoma.

Teaching Assistant 2023-Present
Chalmers and Gothenburg University Gothenburg, Sweden

- My role revolves around grading coursework, offering individualized guidance to students, assisting with administrative tasks, and contributing to curriculum discussions.
- Courses I've assisted in: Object-Oriented Programming, Embedded Systems and C Programming, Systems Development, Requirements Engineering.

*European Credit Transfer and Accumulation System, 60 ECTS credits are the equivalent of a full year of study.

- Participated in the website development (and the platform's UI/UX design) featuring contemporary visuals: www.klasfarm.sk.
- Technologies used: Next.js, JavaScript, Tailwind CSS, Shell & Linux administration, Python, Go.

- Engaged in various aspects of education at the faculty, represented students in decision-making bodies.
- Chairman (2023-2024), Head of Finance (2024-2025) of *SKIP* Student Association, under Göta Student Union; spearheaded the planning of events, e.g. Hackathons, seminars, workshops, and guest lectures.

Skills

Programming Languages: Python, Haskell, Java, TypeScript, Go, C/C++, Assembly, Bash/Shell, R, MATLAB

Tools: Pandas, NumPy, Scikit-learn, PyTorch, QuickCheck, Vue.js, Next.js, React (Native), Docker, MongoDB, pSQL & SQL, CLI/Unix, L^AT_EX, Git (GitHub/GitLab etc.), HuggingFace, Arduino

Other: Open-source Software, Operating Systems, Electronics, Project Management, LLMs, Adobe After Effects & Photoshop, Figma, Affinity Photo, Video Editing, Graphic Design, Teaching, Academic Writing

Projects

AppointDent	2024	MiniCarSteer	2024
– <i>AppointDent</i> is a website-based application using a microservices architecture aimed to assist Swedish residents manage dentist appointments and provides dentists with tools to organize their schedules efficiently, written in TypeScript and Solid.js.		– A data-driven algorithm to determine the steering angle of a miniature self-driving vehicle using sensor data, implemented in a Python, Docker-supplied environment.	
ActInSpace Hackathon	2022-2023	PastExams	2023-now
– Documentation repository for “Space Debris Collector Project,” including competition materials from national and international rounds, alongside a product showcase website (React).		– An automated exam archival system with CI/CD pipeline, using Node.js and to maintain a monorepo and generate a searchable static (Jekyll) website of departmental examination materials.	
IEEE conference paper	2024	CompSci	2023-now
– IEEE-styled paper: “On the Design of Software Processes and Software Process Improvement in the Context of Lego Scrum Workshops”		– A repository of programs demonstrating algorithms and various programming concepts, implemented across multiple programming languages.	

Language Proficiency, Awards, Licenses & Certificates

Language	Level
Slovak, Czech	Native
English	Native
Swedish	C1
German	B2
Spanish	B1

- Winner of *ActInSpace* Hackathon (national round), 2022
- TOEFL iBT (Academic English), 2022
- Swedish as Second Language, *Folkuniversitet*, 2024
- CS50 Introduction to Computer Science, *Harvard University*, 2021
- Pre-University Calculus, *Technische Universiteit Delft*, 2022
- The Duke of Edinburgh's Award (Bronze), Slovakia, 2020
